

Your life counts!

You matter!

You're sleeping rough or in unstable accommodation?

This could mean ...

your immune system is weakened.

your body is under a lot of strain.

you might have preexisting viruses (HIV, Hep. C, etc) or other underlying health conditions e.g. high blood pressure or diabetes and you may be more likely to partake in at risk behaviours e.g. smoking.

Thus the corona virus could be particularly harmful for you!

Please look after yourself and respect guidelines which help protect you from infection.
